IISDOO

IISDOO — Precision Craftsmanship, Redefining Standards in Door Control Hardware.

Founded in 2009, IISDOO is a modern, integrated manufacturer specializing in the research & development, design, production, sales, and service of door control hardware. Our factory is located in Jiangmen, Guangdong, China, spanning an area of 10,000 square meters. It is equipped with advanced fully automated production lines, precision die-casting equipment, and digital machining centers.

We are dedicated to providing global clients with comprehensive, high-quality door hardware solutions. Our product portfolio includes:

Architectural Door Lock Series: Smart Locks, Mechanical Locks, and Commercial/Project Door Locks (suitable for wooden doors, glass doors, narrow-frame glass doors, hidden doors, etc.).

Guided by the philosophy of "Quality as Foundation, Innovation as Drive," IISDOO rigorously implements the ISO 9001 Quality Management System. We have established a full-process quality traceability system, covering everything from raw material inspection and production control to finished product shipment. Our products not only meet national standards but are also exported to over 100 countries and regions, including Europe, America, Japan, South Korea, and Southeast Asia. We are proud to be a long-term designated supplier for numerous renowned real estate developers, hotel management groups, and door & window manufacturers. Committed to exceptional craftsmanship and forward-thinking design, IISDOO is dedicated to being your most trusted partner in creating secure, elegant, and seamless spatial experiences.

At IISDOO, we unite advanced craftsmanship with aesthetic innovation through a complete range of surface treatment technologies. Utilizing sophisticated processes including Electroplating, Painting, Oxidation, and PVD (Physical Vapor Deposition), we achieve a seamless fusion of color and metal, enhancing both durability and visual elegance.

Our extensive color palette offers more than 18 refined finishes, allowing you to tailor every detail to your design vision. Available selections include: Polish Chrome, Matt Black, Brushed Brass, 22k Matt Gold, Silver, Matt White and many more...

Each finish is applied with precision to ensure resistance to corrosion, wear, and fading—making our hardware not only beautiful but also built to last. Whether for residential, commercial, or hospitality projects, our finishes meet global standards and adapt to varied architectural styles.

Choose IISDOO to bring refined aesthetics and reliable performance to every door system.

No.1

WOODEN DOORS HARDWARE SERIES /

Where Natural Material Meets Precision Craftsmanship

For years, IISDOO has stood at the intersection of traditional woodworking and precision engineering. As an integrated manufacturer with our own factory and mature expertise forged in the hardware industry, we understand that the perfect door deserves more than just functional components—it deserves a defining accent.

Our Wooden Door Hardware Series is the culmination of this experience, trusted by professionals across 42 countries. From minimalist locks and smart locks to precision hinges and durable door stops, every piece in our comprehensive collection is meticulously crafted in-house to harmonize sturdy, reliable metal with the warm, organic texture of wood. We enhance both the tactile and visual integrity of your wooden doors, ensuring seamless integration whether your vision leans toward modern minimalist clarity or rustic, classic charm. With IISDOO, you're not just selecting hardware; you're choosing the confidence that comes from decades of specialized knowledge and global recognition.

Series Features

Purpose-Built for Wood: Engineered with the characteristics of wood in mind, our hardware offers precise installation and surface-friendly protection to preserve and enhance your door's material.

Rich Surface Finishes: Choose from a range of premium finishes including Polished Chrome, Matt Black, Brushed Brass, 22K Matt Gold, and Silver—achieved through advanced electroplating, PVD, and coating techniques. Each finish is curated to pair perfectly with wood grains and paints such as walnut, oak, and cherry.

At IISDOO, we focus on the foundational details. Our Dual-Rosette System offers two engineered solutions for the structural base of door handles, catering to distinct aesthetic and functional requirements.

- Slim-Profile Rosette: Designed for a sleek, ultra-flush fit. It allows the handle to sit closer to the door surface, creating a seamless, modern aesthetic ideal for minimalist and high-end designs.
- Reinforced Thick Rosette: Built for maximum durability in high-traffic areas. Its robust construction provides superior load-bearing capacity, ensuring long-term security and steadfast performance.

Choose the precision that matches your project's demand for elegance or endurance

At IISDOO, we engineer the critical components that define a door's integrity and movement—focusing on the secure core and the seamless pivot.

1. The Secure Core: Dual-Material Lock Cylinder
Our lock cylinders combine zinc alloy and stainless steel for a balance of design freedom and enduring strength. The zinc alloy allows for diverse, intricate shapes to match any aesthetic, while the embedded stainless steel core provides superior resistance to corrosion, wear, and tampering.

2. The Pivot Point: 15 Years as a Hinge Specialist
For 15 years, our dedicated hinge factory has focused on perfecting door movement. Building on this expertise, in 2026 we will expand our portfolio with advanced Hydraulic Hinges for controlled closing and Concealed Hinges for a minimalist, seamless look..
